Art Unit: 1731

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to an aerodynamic method of making tissue paper

Group II claim(s) 6-10, drawn to an apparatus for making tissue paper.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Claim 6 is either obvious over or anticipated by USSR Certificate 1594237 (see 6-6-2002 IDS) or U.S. Patent 3,949,035 (see 2-4-2002 IDS). Accordingly, the special feature linking the two inventions, forming a layer of cellulose fibers from an aerosuspension, impregnating the layer by a liquid and subsequently pressing and drying the layer; does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore, restriction is appropriate.

A telephone call was made to Mr. Scott A. Ouellette on April 17, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
